

## FIRST ASSEMBLY OF GOD

25 February, 2001

Scott, Kim and Phil:

Just a note to say a huge THANKS for all your wonderful hard work to put our system in. It sounds full and rich and we are finally rid of that abrasive noise we have endured for so, so long. I can't believe what we used to have compared to what we experienced Sunday morning. It was tremendous.

I was very nervous about it --- since congregations are not afraid to tell you what they think about stuff like this ---- but it turned out great for the 'common ear' also. I am amazed at the number of 'regular' folks' who noticed the difference right away. Comments I heard were:

- Professional sounding
- Rich sounding
- Even sounding
- I could hear all the parts
- I could hear the low end well
- It didn't make me want to cover my ears
- And so on, and so on. . . .

Thank you, also --- for your workability, interest, professionalism, kind spirits and smiles. That made it extra nice for me.

I understand that you are coming this next week, too - is that right..... when our normal console comes back in. I hope I'm right about that. We could use you another weekend. I will be out of town from Monday until late Friday night - Springfield, Missouri - teaching a college class for a week.

You can contact Eric if you need anything and he can contact Henry or the other guys for you.

Thanks again so much.

See you soon.

Kevin Taylor  
Fine Arts Pastor
